

# The Atomic Layer Thermopile - A New Heat Transfer Measurement Technique in Fluid Mechanics and Thermodynamics

A thesis submitted to the Faculty of Aerospace Engineering and Geodesy of the  
Universität Stuttgart in partial fulfilment of the requirements for the degree of  
Doctor of Engineering Sciences (Dr.-Ing.)

<b>Abstract</b>	<b>IV</b>
<b>Kurzfassung</b>	<b>V</b>
<b>Nomenclature</b>	<b>VI</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Motivation . . . . .	1
1.2 Heat Transfer Measurement Techniques - Placement of the ALTP . . . . .	4
1.3 Test Envelope of the ALTP . . . . .	6
<b>2 Fundamental Characteristics of the Atomic Layer Thermopile</b>	<b>11</b>
2.1 Principle of Operation . . . . .	11
2.2 Protective Coating and Optical Properties . . . . .	13
2.3 Thermal Properties and Modeling . . . . .	14
2.4 Design of Single Sensor Module . . . . .	18
2.5 Design of Linear Sensor Array . . . . .	19
2.6 Signal Amplification and Conditioning . . . . .	20
2.7 Static Calibration . . . . .	21
2.8 Dynamic Properties and Calibration . . . . .	24
<b>3 Experiments in Subsonic Flows</b>	<b>31</b>
3.1 Heat Transfer Measurements on the Tip Wall of a Ribbed Channel . . . . .	31
3.1.1 Experimental Setup . . . . .	32
3.1.2 Experimental Results . . . . .	34
3.1.3 Remarks on the Suitability of ALTP Sensors for Turbomachinery Studies . . . . .	41
3.2 Heat Transfer and Pressure Measurements on the Surface of a Circular Cylinder . . . . .	41
3.2.1 Experimental Setup . . . . .	42
3.2.2 Experimental Results . . . . .	45

<b>4</b>	<b>Experiments in Supersonic Flows</b>	<b>51</b>
4.1	Stagnation-Point Heat-Flux Measurements at $M=2.5$ . . . . .	51
4.1.1	Theoretical Relations. . . . .	51
4.1.2	Probe Body Design. . . . .	53
4.1.3	Experimental Setup. . . . .	54
4.1.4	Experimental Results. . . . .	55
4.2	Stagnation-Point Heat-Flux Measurements in the High-Enthalpy Plasma Regime . . . . .	56
4.2.1	Experimental Setup . . . . .	56
4.2.2	Experimental Results . . . . .	58
4.3	Transition Studies of a Boundary Layer behind a Moving Shock Wave . .	60
4.3.1	Theoretical Relations and Overview . . . . .	60
4.3.2	Experimental Setup . . . . .	62
4.3.3	Experimental Results . . . . .	64
4.4	Dynamic Response Evaluation by a Passing Shock Wave . . . . .	68
4.4.1	Experimental Setup . . . . .	69
4.4.2	Experimental Results . . . . .	70
<b>5</b>	<b>Experiments in Hypersonic Flows</b>	<b>79</b>
5.1	Stagnation-Point Heat-Flux Measurements at $M=12$ . . . . .	79
5.1.1	Experimental Setup . . . . .	80
5.1.2	Experimental Results . . . . .	82
5.1.3	Total-Temperature Determination . . . . .	88
5.2	Hypersonic Transition on Sharp Cone at $M=6$ : Mach-6-Quiet-Tube . . . .	90
5.2.1	Experimental Setup . . . . .	91
5.2.2	Experimental Results . . . . .	95
5.3	Hypersonic Transition on Sharp Cone at $M=6$ : HL Braunschweig . . . . .	104
5.3.1	Experimental Setup . . . . .	105
5.3.2	Experimental Results . . . . .	108
5.4	Hypersonic Transition on a Sharp Cone at $M=12$ : ITAM AT-303 . . . . .	120
5.4.1	Experimental Setup . . . . .	121
5.4.2	Experimental Results . . . . .	123
5.5	Hypersonic Transition on a Flat Plate at $M=6$ . . . . .	131
5.5.1	Experimental Setup . . . . .	132
5.5.2	Experimental Results . . . . .	133
5.6	Investigation of Laser-Generated Flow Perturbations on a Flat Plate at $M=6$ . . . . .	142
5.6.1	Experimental Setup . . . . .	142

5.6.2	Experimental Results . . . . .	143
<b>6</b>	<b>Summary and Conclusions</b>	<b>147</b>
<b>A</b>	<b>Appendix</b>	<b>153</b>
A.1	Overview of Heat-Transfer Measurement Techniques . . . . .	153
A.1.1	Mass-Transfer Analogy Heat-Flux Measurement Techniques . . . . .	153
A.1.2	Energy Supply or Removal Heat-Flux Measurement Techniques . . . . .	154
A.1.3	Calorimetric Heat-Flux Measurement Techniques . . . . .	154
A.1.4	Differential Temperature Heat-Flux Gauges . . . . .	159
A.1.5	Transverse Seebeck-Effect Heat-Flux Gauges . . . . .	162
A.2	TLC Distribution of Nusselt Number on the Tip Wall of a Ribbed Channel	163
